ABOUT ME

I am an experienced software developer with a strong understanding of product development processes in the IT industry. With a solid foundation in software development and industry-standard practices, I have successfully contributed to multiple projects, delivering efficient and scalable solutions. My expertise includes working with cross-functional teams, understanding client requirements, and applying best practices to deliver high-quality products. I am passionate about technology and continuously expanding my knowledge to build a successful career in the IT field.

SKILLS

- HTML, CSS
- JavaScript
- ReactJs
- Bootstrap, Tailwindcss
- MySql
- Chatgpt
- Python
- C Language

PROJECTS

Project 1

I developed a complex e-commerce website using React.js, where I utilized Material-UI and Bootstrap for styling. I also used npm packages and implemented various functionalities. Through this project, I learned a lot about how projects are developed in the industry.

Technologies
- ReactJs
- Bootstrap
- MUI
- Npm Package
- Slick Crousel
- React Hooks

Project 2

I have developed a responsive frontend for a food service website, ensuring compatibility across all devices using HTML, CSS, JavaScript, and Bootstrap technologies.

Technologies
- Html
- Css
- JavaScript
- Bootstrap

Project 3

I have developed a registration system for skydiving adventures using Node.js, Express, JavaScript, and MongoDB. The system allows users to register and login for skydiving experiences, storing user data in MongoDB using RESTful APIs.

Technologies
- NodeJs
- Express
- JavaScript
- MongoDb
